GROUT GONE

TECHNICAL SPECIFICATIONS

Grout scraper for quick and easy removal of grout between tiles in bathrooms, kitchens or tiled floors. Simple to use with no need for power tools.

BENEFITS

- **Abrasive blade removes grout easily with no power tools**
- **Clean, safe, precise & effortless**
- **Removes set amount of grout without digging in too far**
- **Easy blade replacement**
- **Suitable for both trades & home DIYers**
- **Long blade is 3x faster than standard grout rakes**
- **The blade's position can be switched to remove grout in corner joints**

HOW IT WORKS

1. Ensure the abrasive blade is securely attached

2. Slide the tool back and forth along a grout joint

3. Check the desired amount has been removed

For removing grout at corner joints or edges, attach the blade to the side of the tool.
